PennDOT Project Id: 114559

Project Administrator: PennDOT

Title: Systemic Low-Cost Improvements for Stop

Improvement Type: Safety Improvement

State Route: 944

Municipality: East Pennsboro (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Actual Construction Bid Date:

Estimated Construction Bid Date:

Location: SR 944 (Wertzville Rd) between US 11/15 and SR 34 in Cumberland County, SR 116 (Fairfield Rd) between Bullfrog Rd and SR 16 Waynesboro Pk) in Adams County, SR 3054 (Richland Ave) at the intersection of Richland Rd and Kings Mill Rd in York County

Project Description: This project recommends implementing a combination of the applicable systemic signing and pavement marking improvements at stop-controlled intersections described in the 2012 District Guidance for Intersection Safety Implementation Plan (ISIP) at 12 intersections selected from three Road Safety Audits (RSAs) conducted by District 8-0. The three RSAs were for SR 0944 (Wertzville Road) in Cumberland County, SR 0116 (Fairfield Road) in Adams County, and SR 3054 (Richland Avenue) in York County and all recommended similar stop-controlled intersection improvements as a low-cost safety improvement for the study corridors.

SR 0944 (Wertzville Rd.) between US 11/15 and SR 0034 is generally a two-lane undivided roadway that transitions from an urban curbed section to a rural two-lane roadway. Where Wertzville Rd. intersects with I-81 the section widens out and is signalized at the I-81 ramps. There are over 50 stop-controlled intersections within the RSA study length. Of these, seven experienced higher crash histories over the 2013-2017 five-year period, and these seven were recommended for systemic stop-controlled intersection improvements.

SR 0116 (Fairfield Rd.) between Bullfrog Rd. and SR 0016 (Waynesboro Pike) is generally a two-lane undivided roadway that transitions from an urban curbed section in Fairfield, PA to a rural two-lane roadway. SR 0116 is the primary arterial utilized by motorists unfamiliar with the area to access Liberty Mountain Resort. There are 22 stop-controlled intersections within the RSA study length. Of these, three experienced higher crash histories over the 2013-2017 five-year period, and these three were recommended for systemic stop-controlled intersection improvements.

SR 3054 (Richland Avenue) is generally a four-lane undivided roadway north of Country Club Road with residential, commercial, and industrial roadside development along both sections. Most of the intersections along the study corridor were signalized, however the intersection of Richland Road and Kings Mill Road is stop controlled and in the 2013 - 2017 five-year period experienced 17 reportable crashes. 7 of the crashes (41%) were angle crashes and 5 of the crashes (29%) were rear end crashes.

The intersections for the three RSAs have been combined into one project to aggregate the systemic stop-controlled intersection countermeasures into one project. The proposed countermeasures will target the high crash stop-controlled intersections in the RSA study areas and contribute to a reduction in crashes experienced on all three corridors.

Project Costs(In Thousands)

Total FFY 2021-2032 Cost		\$343					

PennDOT Project Id: 114562

Project Administrator: PennDOT

Title: Systemic Roadway Departure Low Cost Safety

Improvement Type: Safety Improvement

State Route: Improve 944

Municipality: Middlesex (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Actual Construction Bid Date:

Estimated Construction Bid Date:

Location: SR 944 (Wertzville Rd) and SR 696 (Shippensburg Rd) in Cumberland Cnty, SR 116 (Fairfield Rd) in Adams Cnty, SR 2002 (Springwood Rd) and SR 3054 (Richland Ave) in York Cnty, SR 3012 (Jack Rd) in Franklin Cnty, SR 2015 (Sandbeach Rd) in Dauphin Cnty

Project Description: This project recommends implementing a combination of applicable systemic roadway departure improvements as described in the 2012 Pennsylvania Roadway Departure Safety Implementation Plan at 18 locations (details itemized in attachment). Seven of the locations were selected from the Statewide HSM Network Screening and the remaining 11 locations are portions of corridors studied in two Road Safety Audits (RSAs) conducted by District 8-0. The two RSAs were for PA 944 (Wertzville Road) in Cumberland County, and PA 116 (Fairfield Road) in Adams County. Both RSAs recommended similar roadside departure improvements (enhanced signing and marking improvements on curves) as a low-cost safety improvement for the study corridors. Additionally, edge line rumble strips were recommended along the Wertzville Rd. study corridor.

The three proposed systemic RDIP improvements included in this project are:

- * Enhanced Sign and Marking Improvements for Curves - 14 curve locations

- * High Friction Surface Treatment -3 locations

- * Edge Line Rumble Strips - 1 corridor

The locations have been combined to aggregate the systemic RDIP countermeasures into one project.

The proposed countermeasures will target the roadside departure crashes in the RSA study areas and high crash location curves identified in the HSM Statewide Network Screening. This project should contribute to a reduction in crashes experienced on the study and network screening corridors.

One HFST project is not RDIP focused but was included with this project to aggregate the HFST projects into a group for efficiency in advancing an HFST project. That location is the SR 3054 approaches to the Richland Avenue/Kings Mill Road intersection. HFST was recommended in the SR 3054 RSA for this location to address the high crash history at the stop-controlled intersection.

Title: HATS Bridge Reserve Line Item
State Route: 0
Air Quality Status: Exempt from Regional Conformity Analysis

Actual Construction Bid Date:

Estimated Construction Bid Date:

Location: HATS Area

Project Description: This Highway & Bridge Reserve Line Item was created to provide extra funding where needed for projects in the HATS area that qualify for the following fund types:

STP (Surface Transportation Program) - This is a formula-based distribution based on the region's bridge and highway needs on federal aid routes not on the National Highway System.
 BOF - This funding is reserved for federal aid bridges not on the National Highway System.
 185 - This is state funding for state-owned bridges.

Project Costs(In Thousands)

Municipality:

Title: TAP Line Item
State Route: 0
Air Quality Status: Exempt from Regional Conformity Analysis

Actual Construction Bid Date:

Estimated Construction Bid Date:

Location: Harrisburg MPO

Project Description: This item provides funding for the Transportation Alternatives Program (TAP) Reserve Line Item, formerly the Transportation Enhancement Line Item. Funding was established by the Moving Ahead for Progress in the 21st century (MAP-21) Federal legislation.

Projects are submitted by application and then reviewed & evaluated by the Harrisburg Area Transportation Study (HATS) Technical Committee with input from PennDOT. The Technical Committee then forwards projects to the HATS Coordinating Committee for final approval.

Title: CAT Employment Access

Improvement Type: Transit System Improvement

State Route: 0

Municipality:

Air Quality Status: Non-Significant: Not included in regional conformity analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 4/5/19

Location: Harrisburg and York Cities.

Project Description: This proposal is a joint effort between Capital Area Transit and rabbitransit.

The service delivery will be shared 50/50 by the two systems. Private employers have offered to assist in the funding of the service. This project creates a route to connect Harrisburg and York to address the need for expanded workforce in both regions - this project serving the HATS MPO portion of the route/service.

The route will connect the Harrisburg Transfer Center to the York Transfer Center with three large employer connections in between: FedEx Ground, ES3, and Harley Davidson. The connection to the transfer centers allows easy movement from one transit system to the other and allows for the connection to both of the urban fixed route transit networks.

Title: Derry St Safety Improvements

Improvement Type: Safety Improvement

State Route: 3012

Municipality: Harrisburg (CITY)

Air Quality Status: Significant: Included in regional conformity analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 3/25/21

Location: Derry St (SR 3012) from 13th St to 40th St (SR 3005), Swatara Township, Paxtang Borough, and the City of Harrisburg, Dauphin County

Project Description: This project consists of safety improvements including intersection improvements at Berryhill Street and Derry Street and the intersection of Brookwood Street and Derry Street. These intersections will be evaluated for signal improvements, reconfiguration and a potential roundabout. Improvements will also include resurfacing, ADA, signing and pavement markings on Derry St (SR 3012) from 13th St to 40th St (SR 3005) in Swatara Township, Paxtang Borough, and the City of Harrisburg, Dauphin County.
