

2023 Perry County Municipal Equipment Inventory

Purpose: To address a project identified in the **PICTURE PERRY** Comprehensive Plan.

The need was identified through the development of PICTURE PERRY. Costs for equipment purchases and maintenance have risen to rates where some municipal officials have found it overly expensive to own equipment they may not use on a regular basis. Some municipal budgets are overstretched to even consider the outright purchase of certain types of equipment. Capital Improvement Programs (CIP) can assist in where a purchase may span multiple years. Municipalities considering such expenses are encouraged to consider implementing a CIP. The basis for this inventory is to determine what if any municipal equipment can be made available on loan from one municipality to another.

Initially Prepared: April 18, 2023

Support for the Project: The **PICTURE PERRY** Comprehensive Plan offers all of the following:

Goals

- Community Facilities and Utilities Plan Goal 1. Promote and provide for a complete and adequate system of community or public facilities, utilities, and services, responsive to the existing and future community needs of residents and business representatives.
- Community Facilities and Utilities Plan Goal 2. Increase inter-governmental cooperative efforts by supporting positive productive working relationships among municipalities, to consolidate services and costs among adjoining municipalities.

Objectives

- Community Facilities and Utilities Plan Objective 1. Encourage adequate funding for adequate maintenance, development, and expansion of necessary public facilities and services efficiently and cooperatively, thereby reducing the need to raise taxes for such facilities and services.
- Community Facilities and Utilities Plan Objective 11. Assure adequate municipal government by providing adequate administrative and maintenance personnel and equipment needs.
- Community Facilities and Utilities Plan Objective 27. Encourage municipal equipment sharing to reduce the need for purchasing new equipment.

Annual Survey: An annual survey will be conducted to maintain the inventory which should be completed by the municipal road foreman and returned to the TCRPC staff to update the inventory for everyone's benefit.

Inventory Format: The initial test inventory will be conducted with the information developed and will evolve depending upon municipal need. This cover page will remain throughout to provide a backdrop for this pursuit recognizing there will be new municipalities who will need to familiarize themselves with the project. The equipment tables are arranged alphabetically for all of Perry County municipalities as well as the County as the county maintenance department is also interested in participating. The inventory also provides a **sample loan agreement** that can either be used or revised to satisfy municipal need and assurances.

Document Accessibility: The finalized inventory will be accessible to all of Perry County's municipalities from the Perry County Planning Commission's webpage.

Prepared By: Tri-County Regional Planning Commission staff.
