

We Need Your Input

HATS Regional Active Transportation Plan

Covering **Cumberland, Dauphin, and Perry Counties**, this plan will analyze current conditions for walking and biking, and identify the most important on-road routes and off-road trails for connecting communities with places to live, work, and play.

The Active Transportation Plan will serve as both a resource and guide for municipalities in developing active transportation strategies. It will further develop the HATS Regional Backbone, providing a comprehensive network for non-motorized transportation that makes connections to important places and communities in the region.

Please take our survey and utilize our online mapping tool to tell us about trail connectivity in your community. **Your opinion is important!**
